

Quality Management System Scope

Ferrari Stainless And Alloys Limited

Ferrari Stainless and Alloys Limited has based its Quality Management System on the philosophy and approach of the standard-Quality Management Systems Requirements ISO 9001:2015.

Ferrari Stainless and Alloys Limited is able to provide product and services to customer supplied specifications and requirements only, therefore justifying exclusion of product design or development from its Quality Management System.

Ferrari Stainless and Alloys Limited has implemented and applies its Quality Management System to the stockholding and supply of ferrous and non-ferrous alloys in various sections including fittings and the cutting of tube and bar. Together with its sub-contracted processes of polishing, bending, and the general manipulation and interrupted perforation of stainless steel tube.

Ferrari Stainless and Alloys Limited has implemented its Quality Management System at its operational site from which the company conducts its business.
