

# Quality Management System Scope

## The Joint Perforating Company (Coventry)

**JPC (Coventry)** including its remote support function has based its Quality Management System on the philosophy and approach of the - Automotive Quality Management System Standard IATF 16949:2016.

**JPC (Coventry)** is able to provide product and services to evaluated customer supplied specifications and specific requirements only, therefore justifying exclusion of product design or development requirements from its Quality Management System.

**JPC (Coventry)** has implemented and applies its Quality Management System to its manufacturing process of manipulation, bending and trimming of Stainless Steel Tube.

**JPC (Coventry)** has evaluated its customers specific requirements, considered legislative and regulatory requirements, relevant external and internal issues and the needs and expectations external and internal interested parties, including them within the scope of its Quality Management System.
